

Gonen Maatuk | Senior Product Designer

7+ years | B2B | B2C | SaaS | Complex Systems | AI-Integrated Products

Senior Product Designer with 8 years of experience specializing in UI/UX for complex, data-intensive B2B SaaS and platform-level products. Proven track record of translating complex AI capabilities and backend data into intuitive, human-centered user experiences where accuracy and trust are critical. Expert at building scalable design systems, aligning design strategy with business KPIs, and collaborating with cross-functional product and engineering teams to reduce cognitive load and drive long-term scalability.

Experience

2022 → Present

Easy · Senior Product Designer

- Led end-to-end UX across consumer and business platforms, focusing on clarity, scalability, and measurable product impact.
- Improved onboarding and activation flows, resulting in +17% activation and – 8% time-to-value.
Drove UX improvements that increased feature adoption and retention by 6%.
Built and scaled a cross-team DESIGN SYSTEM, reducing dev/design rework by 25% and improving consistency, speed, and long-term maintainability.
Aligned UX decisions with PRODUCT KPIs including activation, retention, and adoption.
Applied qualitative and quantitative insights to prioritize UX improvements and inform product decisions.
Designed UX for systems where data accuracy, permissions, and decision confidence directly impact business outcomes.

2018 → 2021

42 Studio · Senior Product Designer and Design Lead

- Led UX and UI for B2B SaaS products operating in high-complexity, high-risk domains, including security-, finance-, and infrastructure-oriented platforms.
- Defined UX strategy and DESIGN SYSTEMS for scalable platforms supporting long-term product growth.
Designed dashboards and operational workflows that reduced cognitive load and enabled faster, clearer decision-making.
Collaborated closely with engineers and stakeholders under tight timelines and high system complexity.

SELECTED PROJECTS (42 Studio)

- Antelope SaaS** - Redesigned a call-center platform, reducing agent-to-lead matching time by 20% and improving operational efficiency.
- Magic Square** - Led UX/UI for a crypto DApp marketplace as part of a \$3M Binance-funded investment round.
- Magic Square** - Designed a security-focused system for hotel IT teams, addressing infrastructure risks, permissions, and guest data protection. Translated complex backend security architecture into clear, actionable interfaces for non-security experts.

Independent Projects

RoboNote AI · Senior Product Designer & SaaS Specialist

Analytics-driven SaaS platform integrated with CRM systems.

- Redesigned analytics UX to improve clarity and decision-making, reducing analysis and decision time by 30%.
- Increased dashboard adoption and usage by 25% through improved information hierarchy and data visualization.

Mr. Japan App · Senior Product Designer and UX Expert

AI Travel Companion

- Designed USER-FACING AI FEATURES and conversational experiences for trip planning and real-time Q&A.
- Reduced user confusion and support inquiries by 20% and increased engagement and flow completion by 9%.
- Translated complex AI capabilities into intuitive, trustworthy user interactions that simplified planning and decision-making.
